SmartDocs 2.2.1 Release Notes

SmartDocs 2.2.1 is a minor release for SmartDocs that contains enhancements to existing features and fixes to existing SmartDocs functionality. SmartDocs 2.2.1 also contains support for Microsoft Word 2013, SharePoint 2013, Windows 8, and Office 365.

HOW DO I DOWNLOAD AND INSTALL THIS RELEASE?

You can download SmartDocs 2.2.1 from the SmartDocs downloads page:

http://www.thirtysix.net/smartdocs/downloads.aspx

After downloading the SmartDocs 2.2.1 installer, close all instances of Microsoft Word and execute the installer. After installation has completed, launch Microsoft Word and you can begin using SmartDocs.

If you have a previous version of SmartDocs installed, you will need to uninstall this previous version before installing SmartDocs 2.2.1. You can uninstall SmartDocs using **Add/Remove Programs** (Windows XP) or **Programs and Features** (Windows Vista; Windows 7; Windows 8) in your Windows control panel.

If you have previously activated SmartDocs on your computer, then no activation is required for SmartDocs 2.2.1. If you have not yet activated SmartDocs on your computer, then activation will be required before you can begin using SmartDocs 2.2.1. SmartDocs can be activated from the SmartDocs ribbon in Microsoft Word (**SmartDocs** ribbon tab > **About** menu > **Activate SmartDocs** item).

ARE MY CURRENT DOCUMENTS COMPATIBLE WITH THIS RELEASE?

Yes, SmartDocs 2.2.1 is fully compatible with any document that contains SmartDocs content or data that was created in SmartDocs 2.0.5 or later. No document or content conversion is required.

WHAT ARE THE NOTABLE CHANGES IN THIS RELEASE?

The complete list of enhancements and fixes is provided later in these release notes. The most notable of these improvements include the following:

- The ability to edit and reset the value for all reusable variables in a document from one screen.
- Support for Microsoft Word 2013, SharePoint 2013, and Windows 8.
- Support for hosting a SmartDocs repository in Microsoft's cloud-based Office 365 platform.

DO I NEED TO UPGRADE MY SMARTDOCS REPOSITORY?

No. If you have previously upgraded your SmartDocs repository to 2.2.0 format, then no further repository upgrades are required for SmartDocs 2.2.1.

WHAT IS NEW IN THIS RELEASE?

SmartDocs 2.2.1 contains enhancements that are not available in previous SmartDocs releases. A summary of the enhanced functionality is provided below.

GENERAL

- [E-13035085] Added support for Microsoft Word 2013, SharePoint 2013, and Windows 8.
- [E-12155067] Added support for hosting a SmartDocs repository in Microsoft's cloud-based Office 365 platform.

USER INTERFACE

- [E-13160048] Optimized space available in SmartDocs task pane by removing footer area when the navigation preferences for the task pane are set to "Show large icons with text".

REUSABLE VARIABLES

- [E-13173116] Added the ability to edit and reset the values for the unlocked variables in a document on one screen. The edit feature is available from the SmartDocs ribbon (**SmartDocs** ribbon tab > **Variable Actions** menu > **Edit All Variables** button) and from the Reusable Variables Dialog (**Bulk** menu > **Edit All Variables** item). The reset feature is available from the the Reusable Variables Dialog (**Bulk** menu > **Reset All Variables** item).

REUSABLE SNIPPETS

- [E-13191033] Informational icons are displayed in the SmartDocs task pane when the current reusable snippet (i.e., the snippet the cursor is currently inside of) has related snippets or if the snippet has been used and tracked (using the SmartDocs Usage Tracking feature) in other documents.

DOCUMENT SNAPSHOTS

- [E-13072124] Enhanced the Publish Subfolder functionality so it now supports many levels of subfolders.

SMARTBUILDERS

- [E-13142052] Enhanced the "Delete Content" action so it now supports deleting reusable snippets that have been inserted into the Word template. (previously only bookmarked content could be deleted)

WHAT ISSUES ARE FIXED IN SMARTDOCS 2.2.1?

SmartDocs 2.2.1 contains multiple fixes to improve the performance and stability of SmartDocs. A summary of these fixes is provided below.

USER INTERFACE

- [B-13142092] Fixed an issue that caused the Preferences dialog to display incorrectly on some computers.

REUSABLE VARIABLES

- [B-12256058] Fixed an issue in reusable variable find and replace functionality that was causing some instances of the text being search to be missed.

REUSABLE SNIPPETS

- [B-13035058] Fixed an issue that caused the customized snippet asterik (*) to disappear in the Reusable Snippets dialog when the Refresh icon was clicked.

SMARTFINDERS

- [B-13165048] Fixed an issue in the Sort Reusable Snippets dialog that was causing the Move Up and Move Down icons to no longer function correctly if the snippets were previously sorted by clicking on a column header.

WHAT ARE THE END USER REQUIREMENTS FOR THIS RELEASE?

SmartDocs 2.2.1 supports Microsoft Word 2007, 2010, and 2013 running on Windows XP, Windows Vista, Windows 7, or Windows 8.

SmartDocs 2.2.1 requires that the Microsoft .NET Framework 2.0 is installed on your computer. Most computers already have the .NET Framework 2.0 installed. If you do not have the .NET Framework 2.0 installed you can download and install it from Microsoft's website.

WHAT ARE THE SHAREPOINT REQUIREMENTS FOR THIS RELEASE?

SmartDocs 2.2.1 supports all editions of SharePoint 2007, SharePoint 2010, and SharePoint 2013, including SharePoint Foundation, SharePoint Standard, and SharePoint Enterprise (also known as Microsoft Office SharePoint Server, or MOSS).
